

Some thing I learned was that a
cow with white spots is called a Holstein
cow.

Downtown Value Charter

I learned that a cow can not give
milk until it has a baby. There are
different types of cows.

I learned well a small boy cow grows
up to an man its a Bull and I didn't
know that a cow could grow horns.

I learned that cow's life cycle is it eats and lives alone, then he comes to the barn and grows a baby.

Blue = His favorite color is blue
