

I learned that cows are girls and bulls are Boys.

ONTARIO - Montclair / Monte Vista Elementary

Days  
Vallie

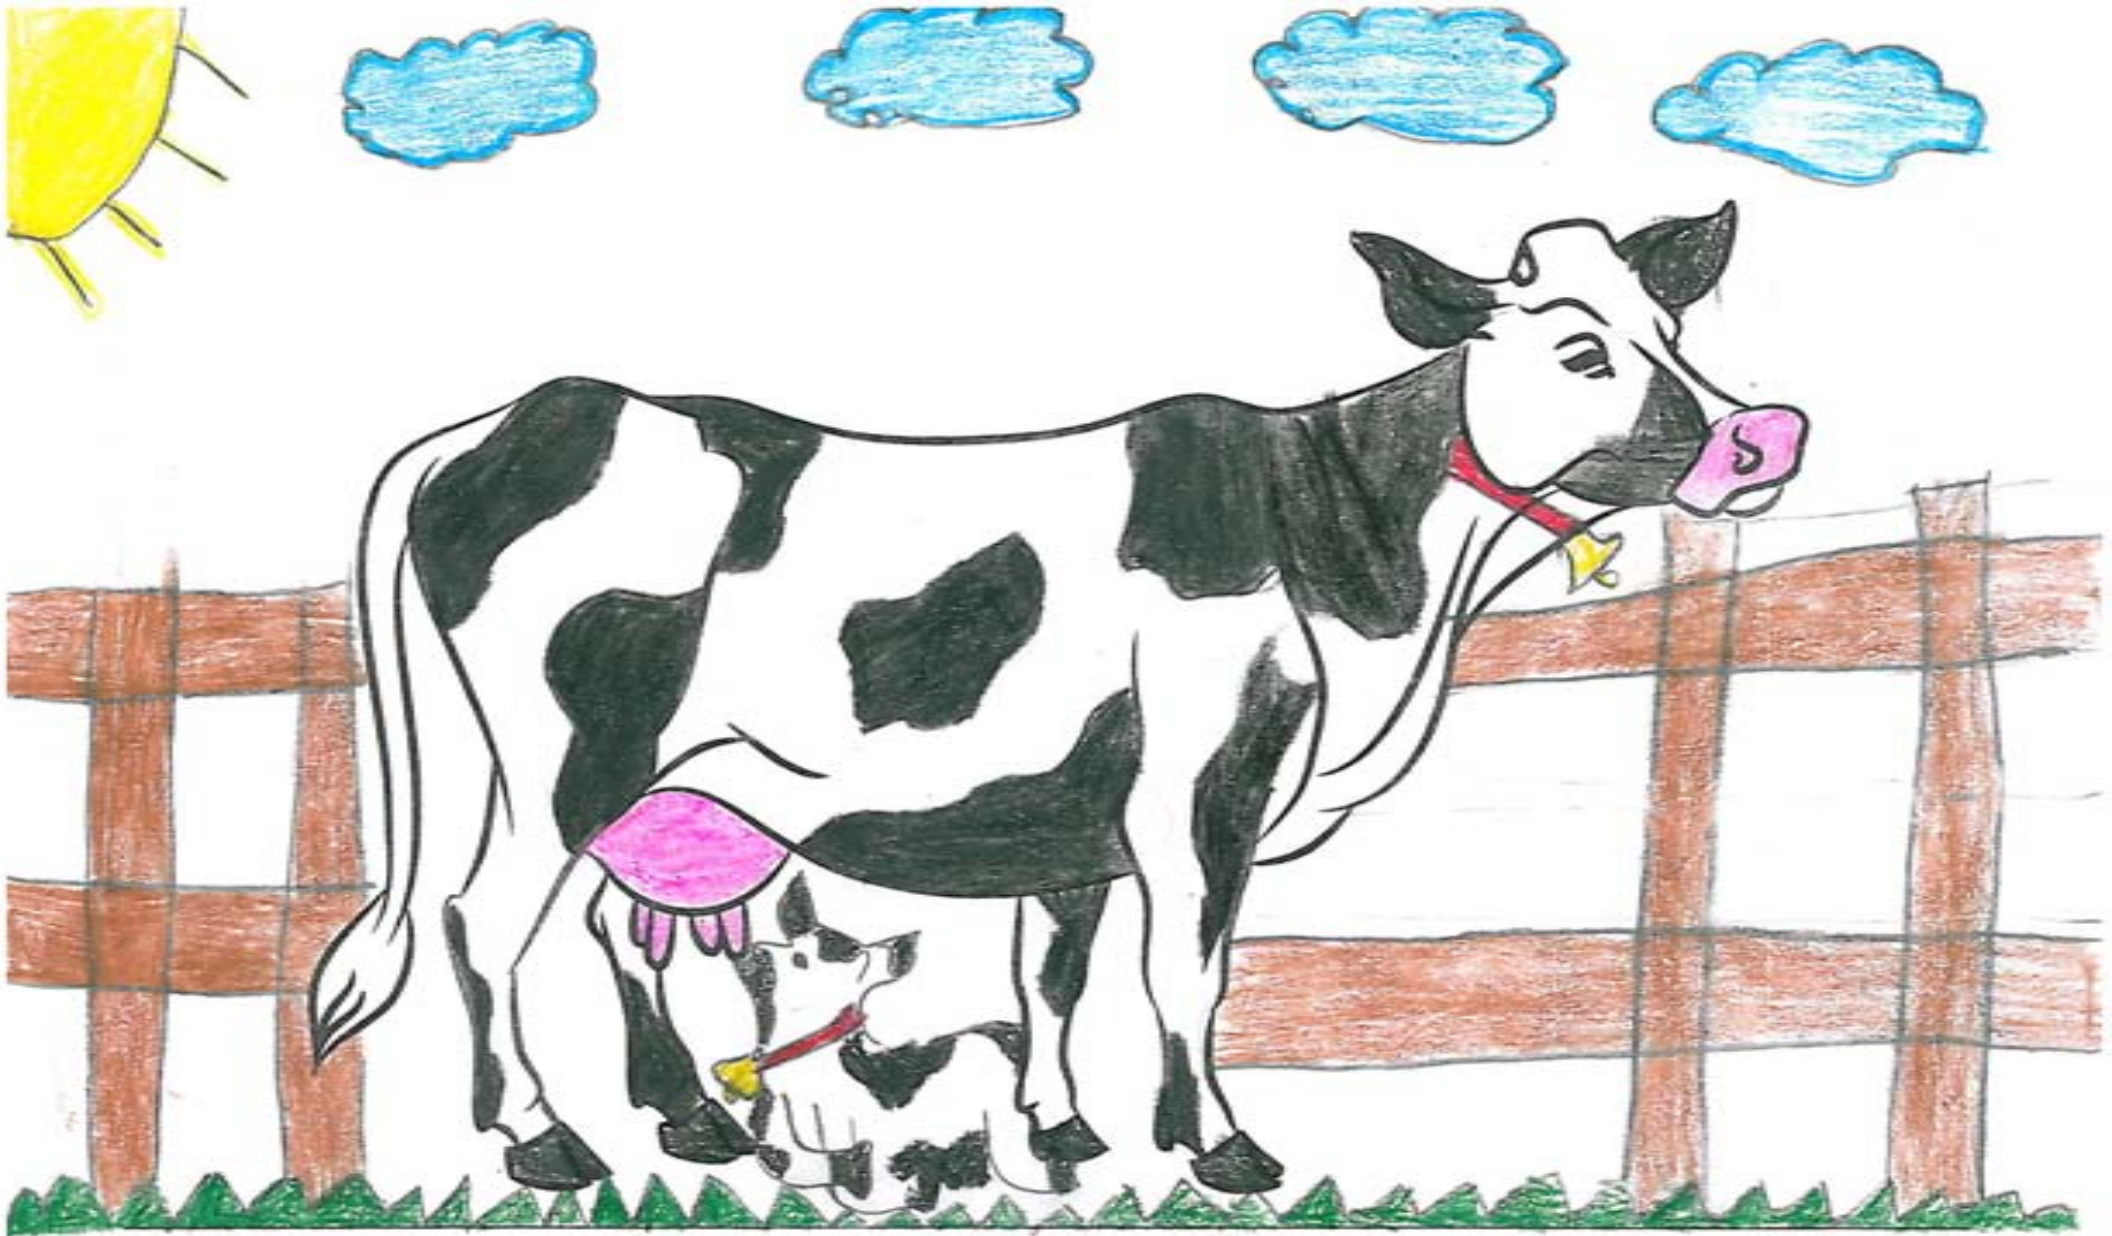

I learned that cows are important to us because they give us milk. Female cows start giving birth at the age of two. Then is born baby calf. ↖ back

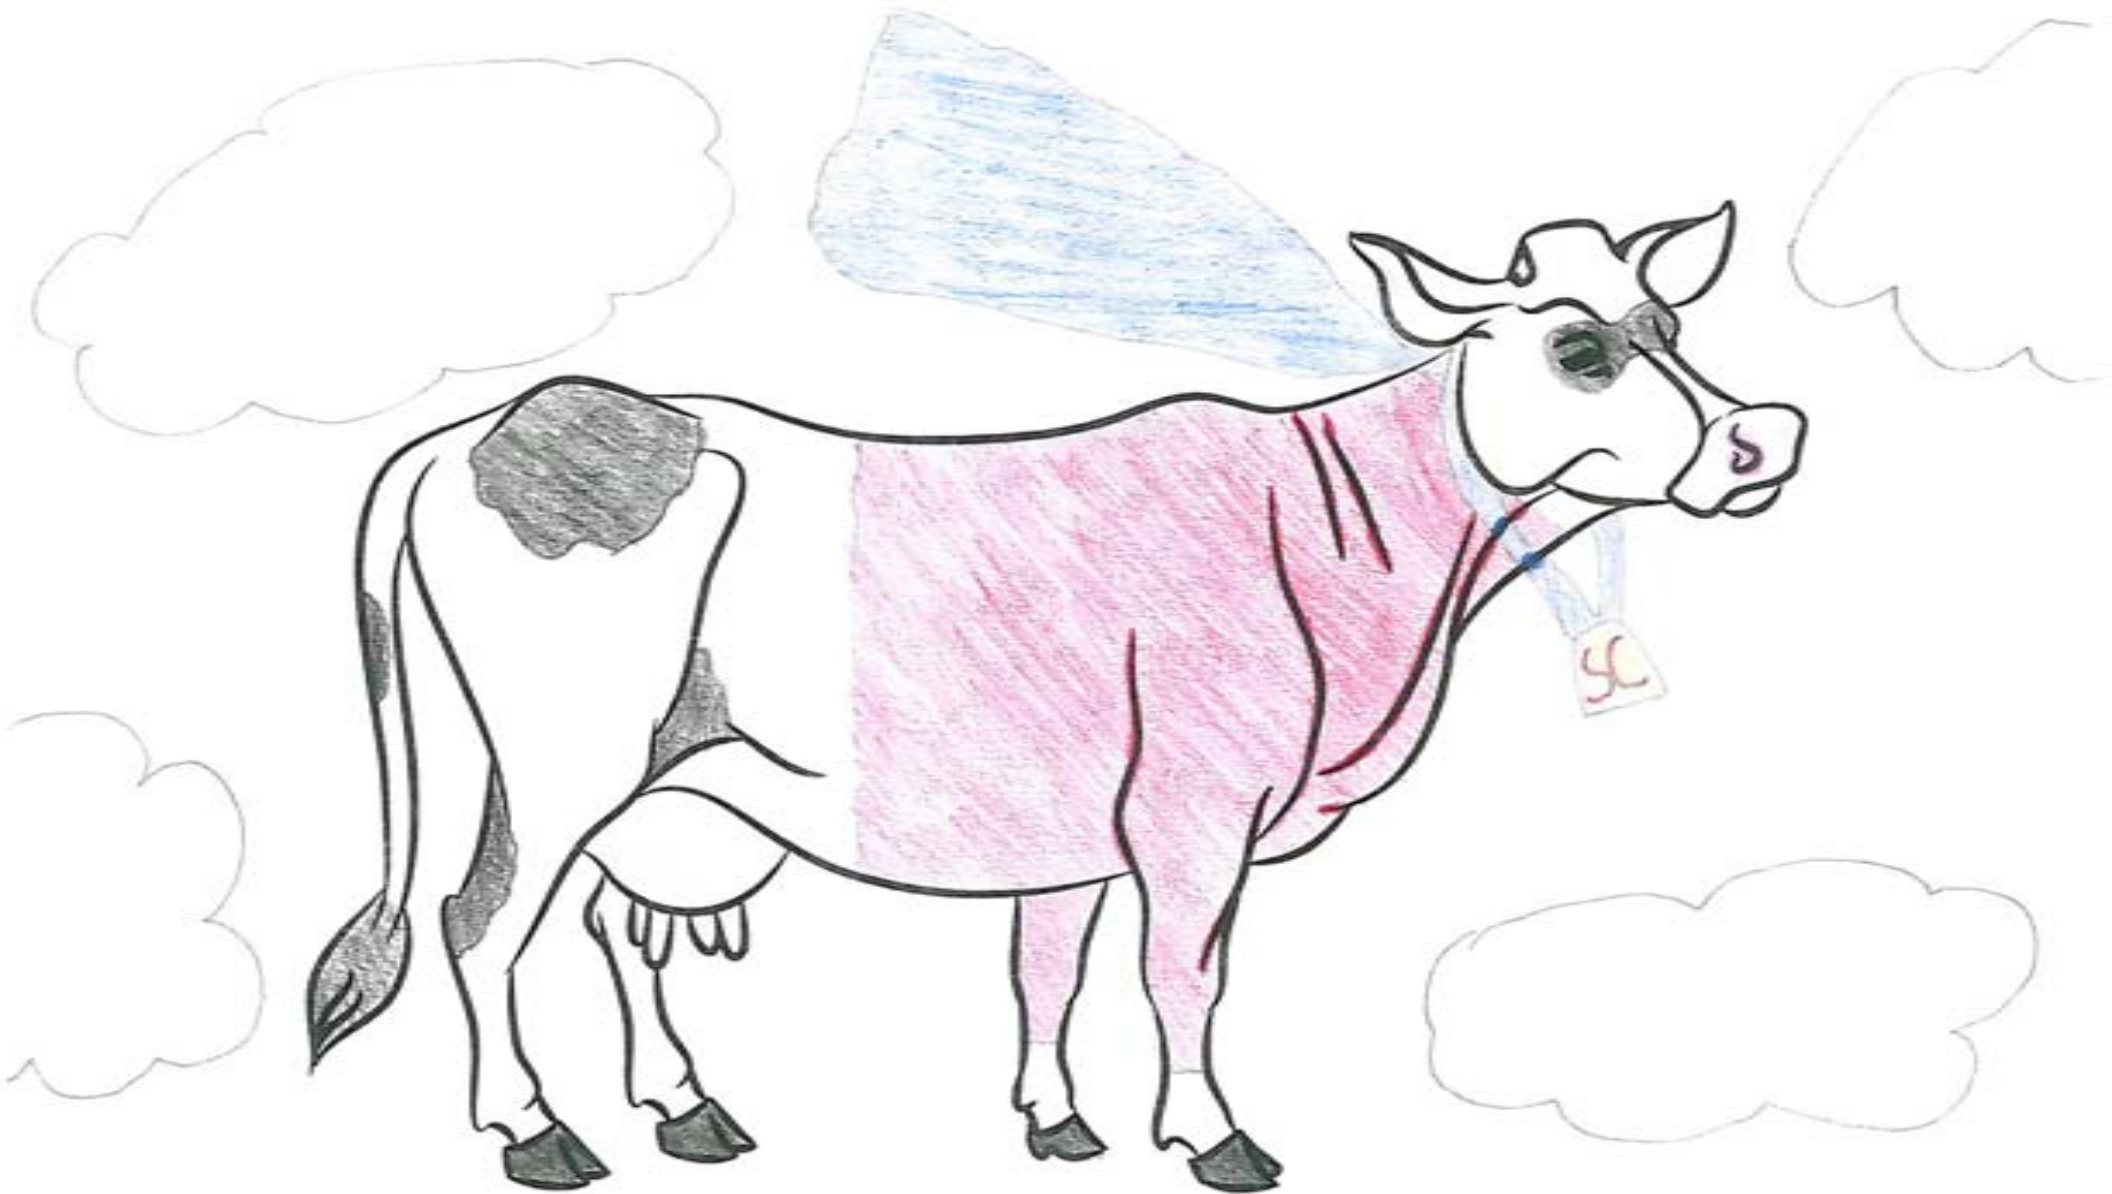

They are one of the most special kind of animals on earth

Because they produce milk, cheese, cake, bread, Sour cream, Ice cream and

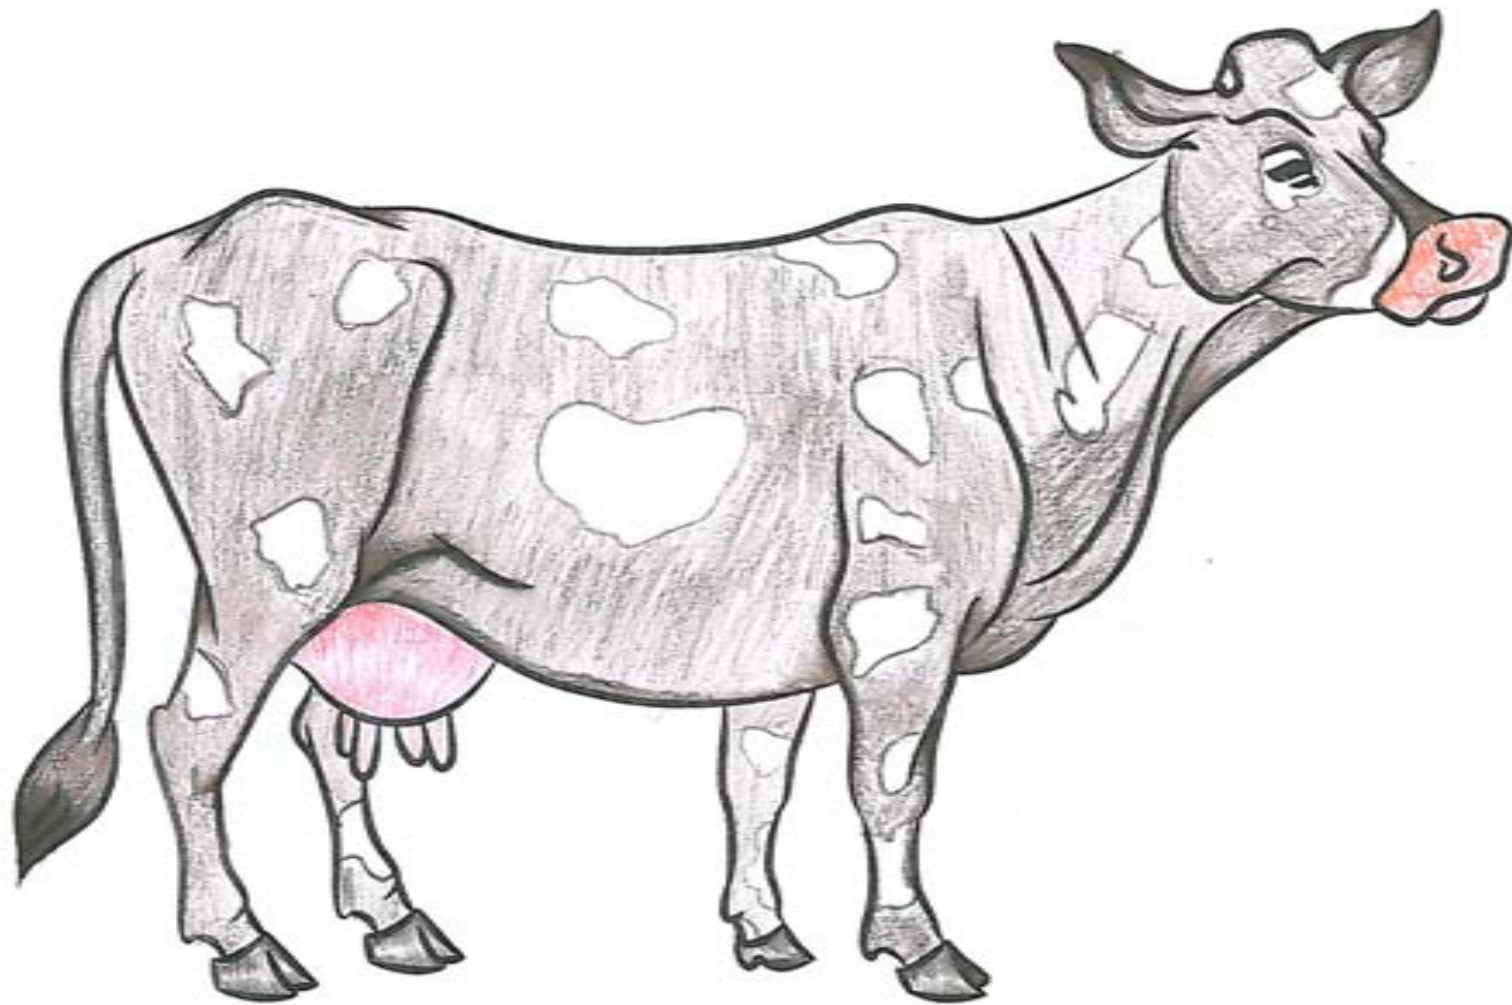

butter, they are good sources of calcium and is very healthy for  
your bones

From my experience I learned that  
we should not take advantage of dairy  
products because if we do there will not be cows

I learned that cows are like superheroes  
because they give us the nutrients we need  
everyday.

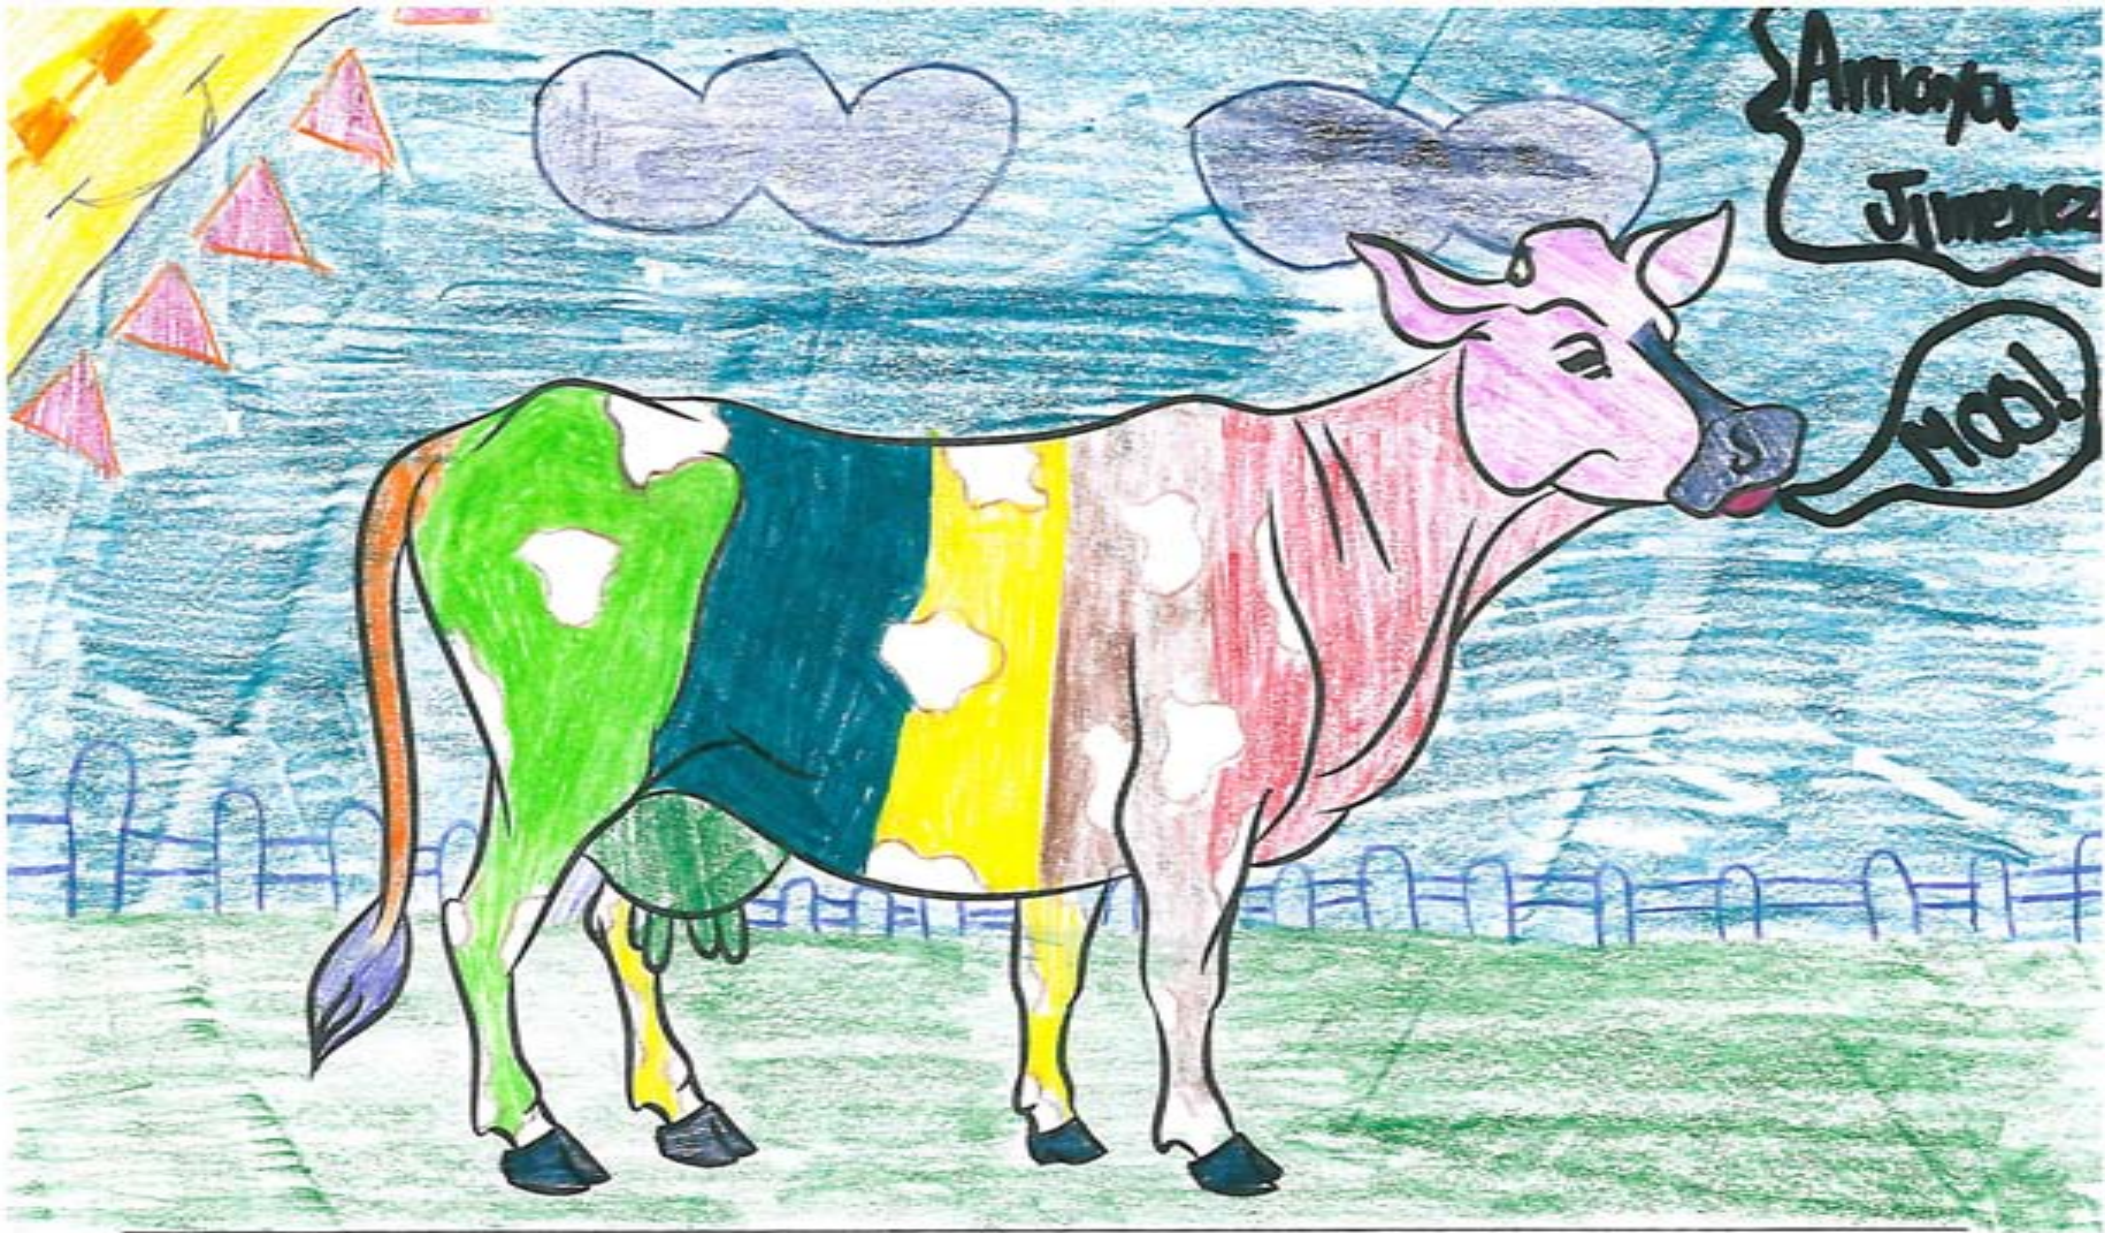

What I learned about Cattles are  
a cow is a girl, a calf is a baby.  
and a bull is a boy. These are called Cattles

I Learned that when they are babies  
they are called cubs and mama cows have  
about 8 gallons of milk.

I learned that Cows have a calf when they  
are 2 years of age.

Cows produce up to 64 qts of milk a day. A cow has about 207 in its body. The pilgrims brought cows to America. Cows drink 30 gallons of water a day.

I learned that cow or bull make  
about 20 gallon of milk. Their are more  
then 1,000 cow. In age of 2 year a cow become

Cynthia  
White

I learned about cows that Mommy  
Cows are called cows. Daddy cows  
are Bulls. Babbies are called calfs

Ernifer Crespo

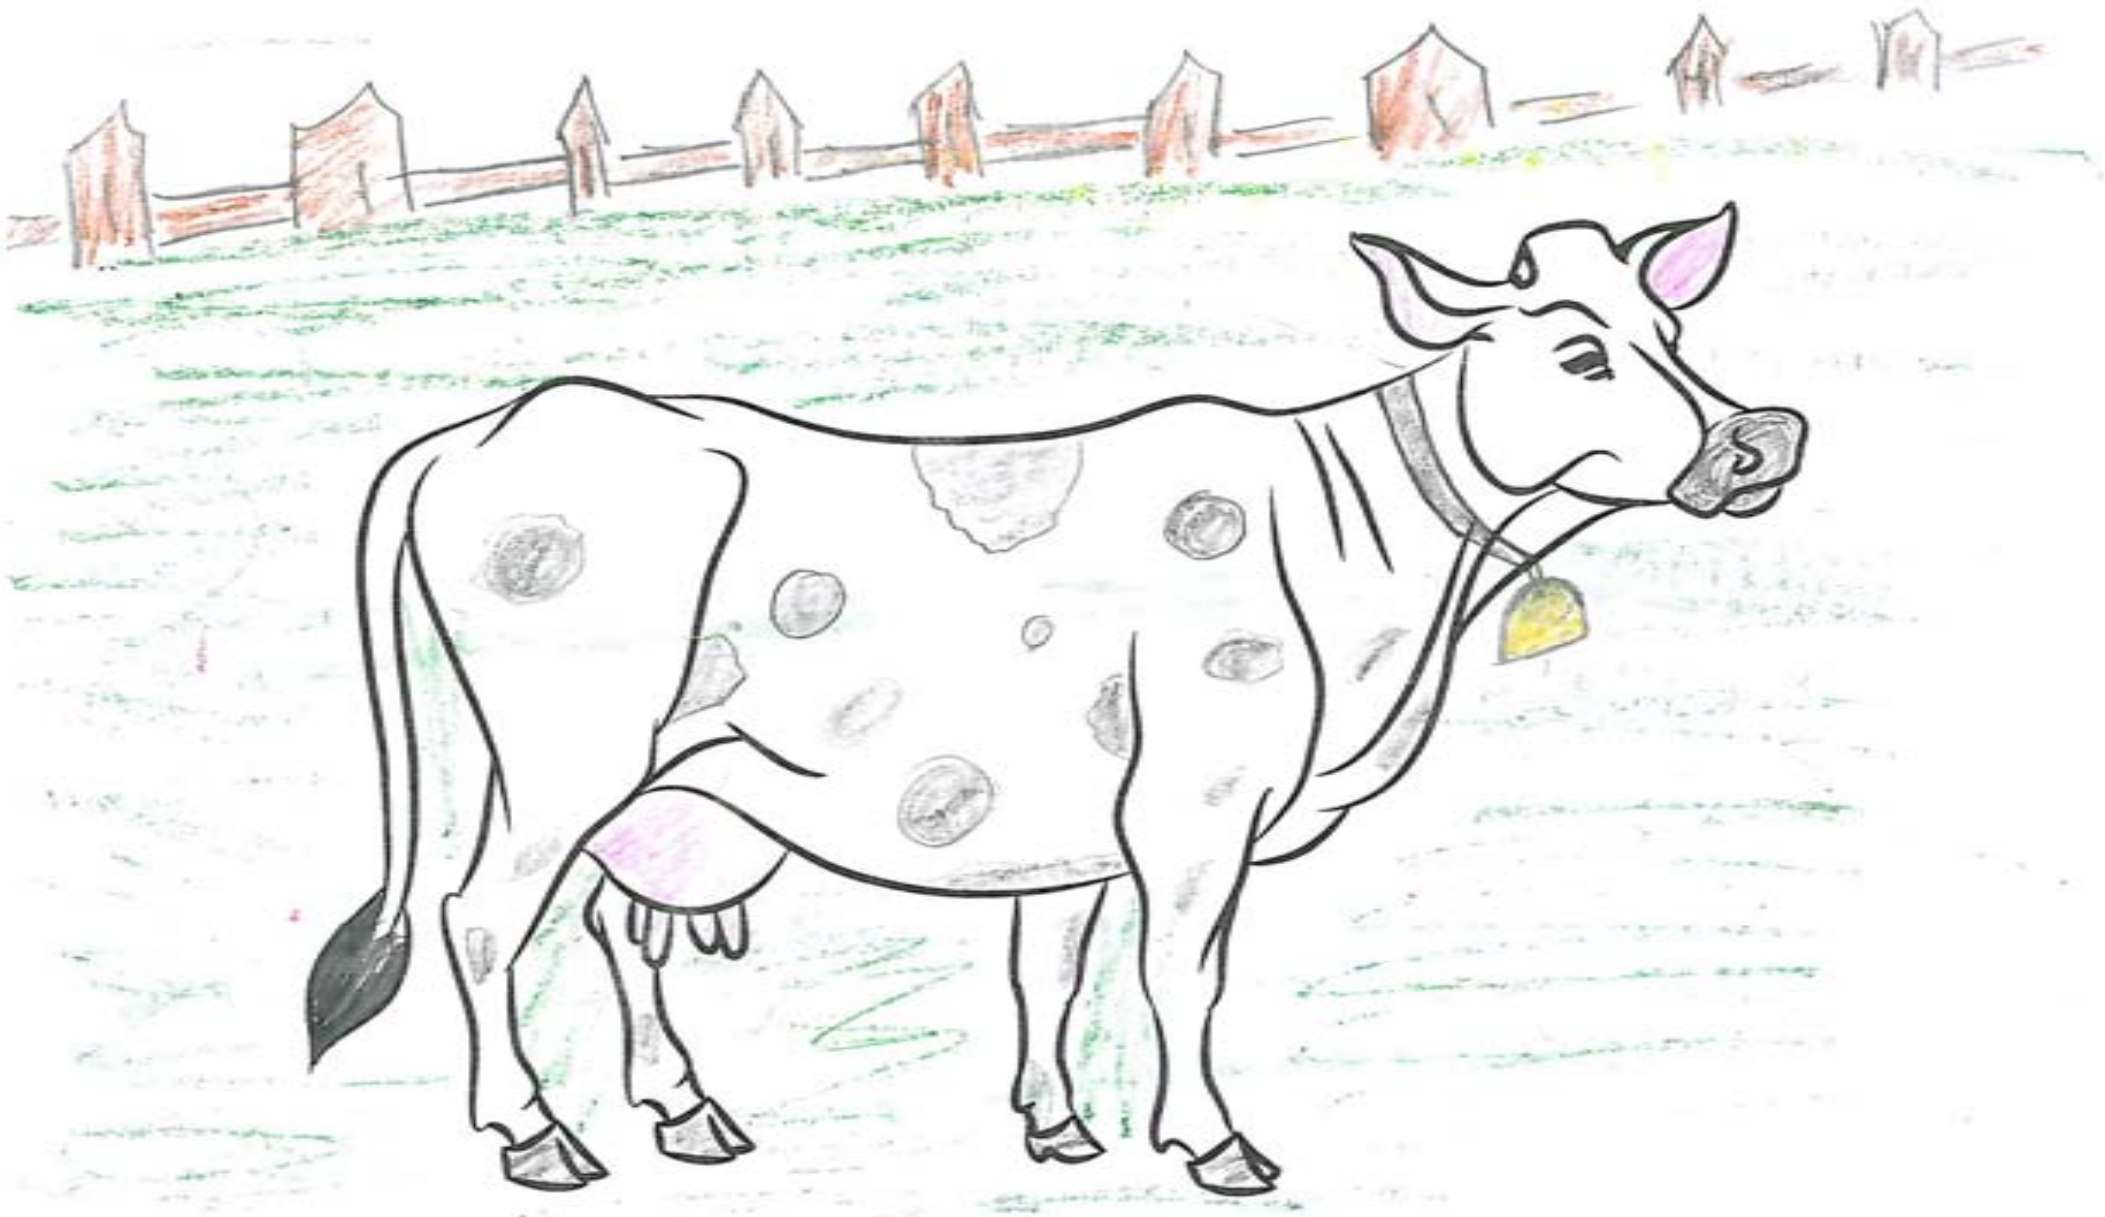

Cow's have four legs and they use there two  
toes to stand or to walk and people don't take  
out milk by hand they use something to take out the

What I learned when the Paryanil came and brought the cow was different kind of cows, how cows eat, and what they use to milk her.

COWS have babies which are called a  
calf. And they have a tag that has a number  
COWS can have a calf a two year old

People don't milk cows by hand  
anymore. now they use a machine  
for the cow.

RUBEN

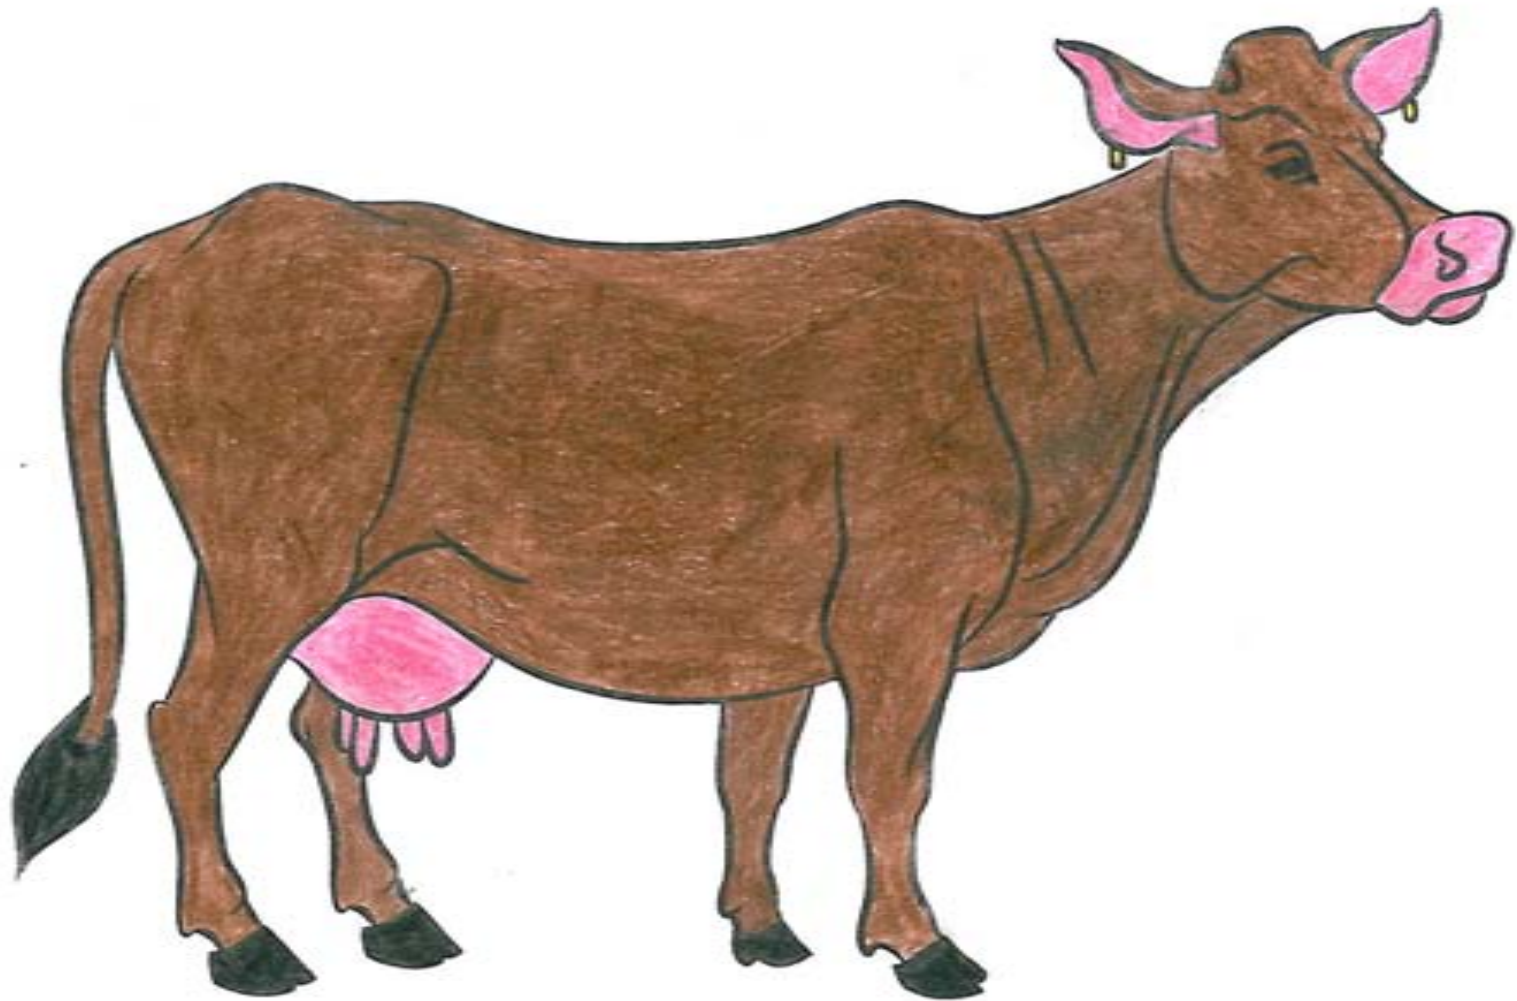

This is a dolly over paper cow. I know  
that a dolly can be a name to get the  
milk. They have numbers on their ears.

I learned that there milk is warm.  
All cows are females. All bulls are males.

Solomon Mapitapula

This is a Daisy cow it is brown, it can make milk, it can grow horns,  
it can eat hay, it could stop growing if it is happy,  
and it is a farm animal.
